Note:

In response to the Convention on Biodiversity (Rio de Janeiro, 1992), the Dendrological Garden Pruhonice informs its correspondents that seeds from this Index are available on an exchange basis, exclusively for institutions working in the areas of research, conservation and education.

No seed material is provided to individuals or commercial firms.

Furthermore, any material obtained from these seeds may not be used to generate commercial profit.

Finally, plant material or its progeny passed on to third parties must adhere to the same conditions.

By ordering seed or other plant material, the recipient accepts and pledges to respect the above conditions.

All collected seed is the result of open pollination and neither purity nor germination is guaranteed.

Great efforts are made to check the identity of the plants from which the seeds are harvested.

However, we are aware that a certain amount of errors cannot be avoided. Your comments on the naming of the material received from this garden are gratefully appreciated.
